

The background is a dark blue gradient. In the top left, a glowing blue DNA double helix is partially visible. Scattered throughout the background are numerous glowing blue spheres of various sizes, some of which are connected by thin, translucent lines, resembling a molecular or nanotechnology structure. On the right side, a horizontal blue line is positioned above the main title.

3RD International Nanotechnology Olympiad

December 6–12, 2026

Taipei, Taiwan

Theme: Nano-biotechnology and Health

Origins of the International Nanotechnology Olympiad (INO)

From a 2016 proposal in Tehran to a founding MOU in 2017 — how the INO began.

Purpose of the International Nanotechnology Olympiad (INO)

A competition where top university students tackle global challenges with nanotechnology

1

Inspire innovation & education

Deepen nanotech learning and raise education standards.

2

Build global talent & teamwork

Grow young talent through global academic collaboration.

3

Drive impact & industry

Turn ideas into startups and industry.

Current Status of the International Nanotechnology Olympiad (INO)

Three editions from 2018 to 2026, each built around a real-world sustainability theme — with Taiwan hosting the next competition.

2018

1st INO · Iran

Theme: Water treatment

2024

2nd INO · Malaysia

Theme: Alternative energy & storage

2026

3rd INO · Taiwan

Theme: Nano-biotechnology & Health

You're Invited to INO 2026 !

WHEN & WHERE

Dec 6–12, 2026 · Taipei, Taiwan

THEME

Nano-biotechnology & Health

WHO CAN JOIN

University teams from around the world

REGISTER BY SEPT 15, 2026

Apply now at nanoolympiad.org

Why Join — And How to Enter

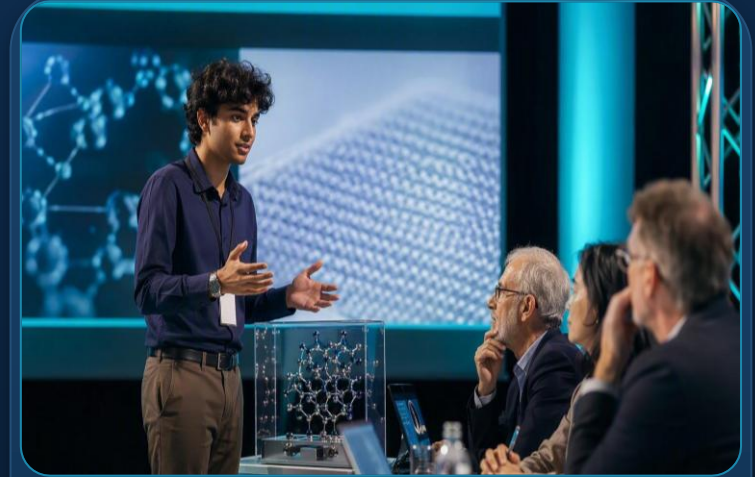

Fully hosted in Taiwan

6 nights funded — stay, meals and local travel covered.

Win & get noticed

Trophies, cash prizes

A world-class stage

Pitch your work to 6–10 international expert judges.

How to Register

DOCUMENTS TO SUBMIT

- 1 Official Registration Form
- 2 Project Proposal
- 3 Team & Individual Photos

Register by September 15, 2026
